

Budget Formulation & Execution Manager (BFEM)

- **Problem:** Federal budget offices were overly-dependent on spreadsheets to formulate their budgets and reports to Congress and OMB.
- **Solution:** Aspex developed a web-based budgeting system based on an Oracle database with a JAVA front-end.
- **Result:** BFEM has been deployed to over 15 Federal agency budget offices. BFEM generates the Congressional Budget Justification (CBJ) and handles pass-backs from OMB.
